### 1. GENERAL INFORMATION

North Bluff Capital Corp. ("North Bluff") was incorporated under the Business Corporations Act (British Columbia) on October 15, 2008 and changed its name to Sun Metals Corp. ("Sun Metals" or the "Company") on May 2, 2018. The Company is listed on the TSX Venture Exchange ("Exchange") in Canada under the symbol "SUNM". Sun Metals is an exploration stage enterprise with its principal focus on the exploration of the Stardust Project located in British Columbia, Canada.

The Company's head office and principal address is located at Suite 1900 – 1055 West Hastings Street, Vancouver, British Columbia, Canada, V6E 2E9. The Company's records office and registered office address is Suite 2600, 1066 West Hastings St., Vancouver, British Columbia, Canada, V6E 3X1.

On May 2, 2018, North Bluff, a newly incorporated wholly-owned subsidiary of North Bluff ("Subco"), and Sun Metals Corp., a private company incorporated under the Business Corporations Act (British Columbia) on June 23, 2017 ("Privco"), completed a transaction (the "Transaction") whereby Subco and Privco amalgamated and the resulting company became a wholly-owned subsidiary of the Company and named Tsayta Resources Corporation ("Tsayta"). As a result of the Transaction, the Company issued to the shareholders of Privco one common share of the Company for each share they held in Privco. The Transaction constituted a reverse takeover under the policies of the Exchange and a reverse acquisition for accounting purposes, with Privco deemed to have been the acquiror (Note 6).

On February 4, 2019 the Company and Lorraine Copper Corp. ("Lorraine") announced they had entered into an arrangement agreement providing for the indirect merger of the companies (the "Arrangement Agreement"). Pursuant to the Arrangement Agreement, on April 12, 2019 the Company acquired, through its subsidiary Tsayta, all of the issued and outstanding common shares of Lorraine by way of a statutory plan of arrangement under the *Business Corporations Act* (British Columbia) (the "Arrangement") (Note 5).

Following completion of the Arrangement on April 12, 2019, the Company owns 100% of the Stardust Project royalty-free. Following completion of the Arrangement, the Company also owns the Lorraine copper-copper project (joint-ventured with Teck Resources Limited), and the OK copper-molybdenum project.

### 2. BASIS OF PREPARATION

#### Statement of Compliance

The Company prepares their annual financial statements in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"). These condensed interim financial statements have been prepared in accordance with International Accounting Standards 34, Interim Financial Reporting ("IAS 34").

These condensed interim consolidated financial statements do not include all of the information required for full IFRS financial statements and therefore should be read in conjunction with the Company's most recent annual consolidated financial statements as at and for the year ended December 31, 2018.

The condensed interim consolidated statements of loss and cash flows for the nine months ended September 30, 2018 are comprised of Privco's results for the period January 1, 2018 to May 1, 2018, and the Company's consolidated results of operation and cash flows for the period May 2, 2018 (the closing date of the Transaction) to September 30, 2018.

### 3. NEW, AMENDED AND FUTURE IFRS PRONOUNCEMENTS

These condensed interim consolidated financial statements have been prepared using accounting policies consistent with those used in the annual consolidated financial statements, except as described below.

#### **IFRS 16 – Leases**

On January 1, 2019 the Company adopted IFRS 16 – Leases (“IFRS 16”). The Company has applied IFRS 16 using the modified retrospective approach under which comparative information is not restated and continues to be reported under IAS 17. Additionally, the Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. As a result of this election, the adoption of IFRS 16 did not have any impact on the recognition and measurement of the Company’s existing operating leases.

The following are the significant accounting policies which have been amended as a result of IFRS 16, and applied at January 1, 2019:

#### **Leases**

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset of a period of time in exchange for consideration. At inception or on reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The right-of-use asset is subsequently depreciated on a straight-line basis from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. If the lease transfers ownership of the underlying asset to the Company by the end of the lease term or if the cost of the right-of-use asset reflects that the Company will exercise a purchase option, the right-of-use asset is depreciated from the commencement date to the end of the useful life of the underlying asset. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment assets. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability. The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company’s incremental borrowing rate. The lease liability is measured at amortized cost using the effective interest rate method, and is re-measured when there is a change in future lease payments. When the lease liability is re-measured, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The Company presents right-of-use assets in ‘property, plant & equipment’, and lease liabilities in ‘lease liabilities’ in the statement of financial position. The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

### 4. SIGNIFICANT ACCOUNTING JUDGMENTS, ESTIMATES AND ASSUMPTIONS

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities and expenses. Estimates and judgments are regularly evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In preparing these condensed interim consolidated financial statements, the significant judgements made by management in applying the Company's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the annual consolidated financial statements.

### 5. ACQUISITION OF LORRAINE COPPER CORP.

Pursuant to the Arrangement Agreement (Note 1), on April 12, 2019 the Company acquired, through its subsidiary Tsayta, all of the issued and outstanding common shares of Lorraine by way of a statutory plan of arrangement under the *Business Corporations Act* (British Columbia) (the "Arrangement").

Pursuant to the terms of the Arrangement, shareholders of Lorraine received 0.54 (the "Exchange Ratio") of a common share of Sun Metals for every Lorraine common share held, all outstanding stock options of Lorraine were exchanged for options to purchase Sun Metals common shares on the basis of the Exchange Ratio and all unexercised Lorraine share purchase warrants were exchanged for warrants to purchase Sun Metals common shares on the basis of the Exchange Ratio. Upon closing of the Arrangement, the Company issued 27,515,380 common shares, 1,755,000 stock options with a weighted average exercise price of \$0.16, and 10,224,408 share purchase warrants with a weighted average exercise price of \$0.27.

The Company determined that Lorraine was not a business in accordance with the definition in *IFRS 3 Business combinations* at the date of acquisition and therefore has accounted for the acquisition as an asset acquisition rather than a business combination. The following table provides details of the preliminary fair value of the consideration given and the fair value of the assets and liabilities acquired as a result of the Arrangement:

<b>Purchase Consideration</b>	
27,515,380 common shares	\$ 16,234,074
10,224,408 share purchase warrants	3,619,120
1,755,000 stock options	833,036

Reclamation Deposits	64,000
Property, Plant & Equipment	2,750
Exploration & Evaluation Assets	21,263,137
	<b>\$ 20,990,225</b>

The Company is in the process of finalizing the fair value allocation between the exploration & evaluation assets acquired. Subsequent to the close of the Arrangement, the Company entered into a capital contribution agreement with Tsayta, whereby Tsayta transferred the 1,500,000 common shares of the Company acquired by Tsayta upon amalgamation with Lorraine to Sun Metals. The common shares were cancelled on June 19, 2019.

### 9. EXPLORATION AND EVALUATION ASSETS AND EXPENDITURES

#### a. Stardust Project, British Columbia, Canada

On September 7, 2017, the Company, through its wholly-owned subsidiary Tsayta, entered into an option agreement (the "Option Agreement") with Lorraine, as amended May 2, 2018, December 17, 2018, and March 26, 2019, pursuant to which the Company had the sole and exclusive option to acquire a 100% interest in the Stardust Project.

Following completion of the Arrangement on April 12, 2019 (Note 1), the Company now owns 100% of the Stardust Project, and any obligations of the Company under the Option Agreement have terminated.

### 13. EQUITY (continued)

- (v) In connection with the Transaction, the Company closed a non-brokered private placement, for aggregate gross proceeds of \$6,447,100 (the "Offering"). Upon completion of the Transaction on May 2, 2018, the proceeds of the Offering were released from escrow. Upon satisfaction of the escrow conditions, each Subscription Receipt was automatically converted into one unit (each, a "Unit") for no additional consideration. Each Unit consists of one common share and one common share purchase warrant, with each common share purchase warrant entitling the holder to acquire one additional common share at a price of \$0.35 per common share until May 2, 2023, subject to acceleration in certain circumstances. Following conversion of the Subscription Receipts, the Company paid \$293,250 in finder's fees, \$107,859 in other cash issuance costs, and issued 1,173,000 Finder's Warrants (with a fair value of \$31,592). The Finder's Warrants entitled the holder to acquire one additional common share at a price of \$0.30 per common share until May 2, 2019.
- (vi) Pursuant to the Transaction, on May 2, 2018 the Company acquired, on a one for one basis, all of the issued and outstanding shares of Privco, in exchange for a total of 34,780,001 common shares of which 21,745,001 common shares are subject to escrow restrictions over a period of three years, 11,140,000 common shares were subject to Seed Share Resale Restrictions ("SSRR") over a period of one year, and 1,895,000 common shares were subject to SSRR over a period of 4 months.
- (vii) On July 24, 2018, the Company issued 500,000 Takla Units pursuant to an Exploration Agreement between the Company and Takla First Nation. The Takla Units are comprised of one common share in the capital of the Company and one common, non-transferable share purchase warrant (each, a "Takla Warrant"). Each Takla Warrant entitles Takla First Nation to acquire one additional common share at a price of \$0.35 until January 24, 2020. The fair value of the common shares issued was determined to be \$92,499 based on the market price of the Company's shares at the date of issuance and the fair value of the Takla Warrants was determined to be \$23,935 based on a Black-Scholes option pricing model (Note 13c).
- (viii) On December 20, 2018, the Company completed a private placement of 12,500,000 flow-through common shares ("FT Shares"), at a price of \$0.413 per FT Share for aggregate gross proceeds of \$5,162,500. A flow-through premium of \$2,412,500, being the difference between the FT Shares subscription price and the market price of the Company's common shares, related to the sale of the associated tax benefits of the qualifying resource expenditures (Note 16b) has been recorded as a flow-through premium liability in the consolidated statement of financial position. In connection with the private placement the Company paid legal fees and filing fees totaling \$63,546.
- (ix) On December 21, 2018 the Company issued 500,000 common shares to Lorraine pursuant to the terms of the Option Agreement (Note 9a).

### 15. SEGMENTED INFORMATION

The Company conducts its business in a single operating segment which is the mineral exploration business in Canada. The Company’s exploration and evaluation asset is located in Canada.

### 16. COMMITMENTS & CONTINGENCIES

- a) The Company’s general and administrative costs, including rent, with respect to its head office premises are paid by Oxygen pursuant to the Oxygen Agreement, and may be terminated by either party giving at least 180 days’ prior written notice of such termination. Upon termination, by the Company, of the Oxygen Agreement, the Company shall pay to Oxygen an amount equal to the average general and administrative fees due under the Agreement as a result of the termination as such term is defined under the Oxygen Agreement, and the Company’s share of any contractual obligations entered into on its behalf by Oxygen. During the nine months ended September 30, 2019 the Company expensed \$90,805 in regards to its head office premises commitment.
- b) As at September 30 2019, the Company is committed to incur, on a best efforts basis, qualifying resource expenditures pursuant to the December 20, 2018 private placement (Note 13b). As at September 30, 2019, the Company had incurred qualifying resource expenditures relating to the FT Shares of \$4,834,513, and at September 30, 2019 reversed the portion of the FT Share flow-through liability relating to expenditures incurred during the period, and recognized a deferred tax recovery of \$2,225,343 in the Company’s consolidated statement of loss and comprehensive loss for the nine months ended September 30, 2019.

The Company must therefore incur the balance of \$290,487 qualifying resource expenditures in relation to the FT Shares before January 1, 2020. If the Company does not spend these funds in

### 17. FINANCIAL INSTRUMENTS AND FAIR VALUE MEASUREMENT

There are three levels of the fair value hierarchy that prioritize the inputs to valuation techniques used to measure fair value, with Level 1 inputs having the highest priority. The three levels of the fair value hierarchy are described below:

**Level 1** – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

**Level 2** – Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability; and

**Level 3** – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The Company does not have any financial assets and liabilities measured and recognized in the statement of financial position at fair value. At September 30, 2019, the carrying amounts of cash, amounts receivable, deposits, reclamation deposits, accounts payable and accrued liabilities are considered to be a reasonable approximation of their fair values, due to their short-term nature and/or the interest rate being earned.

### 18. MANAGEMENT OF CAPITAL

Sun Metals considers the items included in the statement of shareholders' equity as capital. Management of the Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares or return capital to shareholders. The Company is not subject to externally imposed capital requirements. Sun Metals' objectives when managing capital are to safeguard the Company's ability to continue as a going concern, so that it can continue to explore its mineral property interests and continue its operations for the benefit of its shareholders. There has been no change to the Company's approach during the nine months ended September 30, 2019.

### 19. FINANCIAL RISK MANAGEMENT

The Company's activities expose it to a variety of financial instrument related risks. The Board provides oversight for the Company's risk management processes. The type of risk exposure and the way in which such exposure is managed is explained as follows:

#### Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Financial instruments that potentially subject the Company to credit risk consist of cash, amounts receivable and deposits. The carrying amount of financial assets recorded in the financial statements, net of any allowances for losses, represents the maximum exposure to credit risk.

The Company deposits its cash with high credit quality major Canadian financial institutions as determined by ratings agencies. The Company does not invest in asset-backed deposits or investments and does not expect any credit losses.

### 19. FINANCIAL RISK MANAGEMENT (continued)

To reduce credit risk, the Company regularly reviews the collectability of its amounts receivable and establishes an allowance based on its best estimate of potentially uncollectible amounts. The Company historically has not had difficulty collecting its amounts receivable.

The Company's deposit is held by a related party and is not considered to be subject to credit risk.

#### Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. The Company attempts to manage liquidity risk by maintaining sufficient cash balances. Liquidity requirements are managed based on expected cash flows to ensure that there is sufficient capital in order to meet short-term obligations. At September 30, 2019, the Company had cash of \$2,441,678 (December 31, 2018 - \$6,888,625) to settle accounts payable and accrued liabilities of \$1,097,916 and meet its flow-through financing resource expenditure commitment of \$290,487 (December 31, 2018 - accounts payable and accrued liabilities of \$274,917 and flow-through financing resource expenditure commitment of \$5,162,000).

#### Interest Rate Risk

Interest rate risk is the risk that the future cash flows or fair value of a financial instrument will fluctuate due to changes in market interest rates. The Company's cash balance is deposited in an account which earns a variable interest rate. The Company does not believe it is exposed to material interest rate risk on its cash and short-term investments.
